EXPERIENCE

Geomant:

Full Stack Software Developer (September 2021 – June 2026)

- Working on multiple projects and products with different teams
- Taking part in design, development and deployment
- Integrated with Avaya and CRM systems (e.g. Salesforce, ServiceNow)
- Architected and developed microservices-based solutions to improve scalability and maintainability across multiple projects
- Built and maintained full stack features using Java, React, PostgreSQL and MSSQL, leveraging AI tools to speed up development
- Worked on projects used by several thousand active users
- Set up and maintained CI/CD pipelines in Azure

Software Developer Intern (May 2021 – September 2021)

- Implemented a full stack web application using MSSQL, Java and JavaScript.

PERSONAL PROJECTS

Logic — Log Analyzer github.com/markdamics/Logic

- Full-stack log analysis tool with real-time ingestion, filtering, and a live dashboard
- Durable Lucene-backed search with Lucene/SPL/LogQL query support and aggregation charts
- Real-time live-tail log streaming to the UI via Server-Sent Events (SSE), replacing timer-based polling
- Built with Java, Spring Boot, PostgreSQL/H2 and React/TypeScript; Dockerized, with a native desktop (Tauri) build

EDUCATION BACKGROUND

University of Szeged

BSc in Computer Science 2018 – in progress

Bethlen Gábor Secondary School - Hódmezővásárhely

Finished in 2018 with advanced Mathematics and Information Technology
