SUMMARY

Results-driven Full Stack Developer with 5+ years of experience designing and deploying scalable microservices, CRM integrations, and real-time web applications across Java, .NET, and React ecosystems.

EXPERIENCE

Full Stack Software Developer – Geomant

Sep 2021 – Jun 2026

- Architected and deployed microservices-based CRM and Telephony integrations (Avaya, Salesforce, ServiceNow) for platforms serving thousands of active users
- Built full-stack features using Java, React, PostgreSQL, and MSSQL while maintaining CI/CD pipelines in Azure
- Worked on multiple projects and products with different teams, taking part in design, development and deployment
- Leveraged AI tools to speed up development

Software Developer Intern – Geomant

May 2021 – Sep 2021

- Implemented a full stack web application using MSSQL, Java and JavaScript.

PERSONAL PROJECTS

Logic – Log Analyzer

github.com/markdamics/Logic

- Full-stack log analysis tool with real-time ingestion, filtering, and a live dashboard
- Durable Lucene-backed search with Lucene/SPL/LogQL query support and aggregation charts
- Real-time live-tail log streaming to the UI via Server-Sent Events (SSE), replacing timer-based polling
- Built with Java, Spring Boot, PostgreSQL/H2 and React/TypeScript; Dockerized, with a native desktop (Tauri) build
